(57)Abstract:

PURPOSE: To easily attain dust-proof and to increase a high capacity in response to the progress of the recording density improvement technology by providing a specific recording unit to the recorder so as to eliminate an idle period attended on recording medium replacement or battery replacement.

CONSTITUTION: The recorder is provided with a main body section 1 implementing image pickup operation and sound recording or the like and two recording units 2, 3 connected removably to the main body section 1 and receiving and recording a picture signal and an audio signal obtained by the main body section 1. Then the main body section 1 collects a video image and an audio signal of an object being an image pickup object, one of the recording units 2, 3 provided to the main body section 1, e.g. the unit 2 is selected and the video signal and the audio signal are recorded till the memory is fully occupied. When the unit 2 is fully stored, the remaining unit 3 is selected and the video signal and the audio signal are recorded. Thus, an idle period disable of recording attended on replacement of

LEGAL STATUS

[Date of request for examination]

the recording medium is eliminated.

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

(54) 【発明の名称】 カメラー体型記録装置

(57) 【要約】

【目的】 本発明は現状のカメラー体型記録装置における記録媒体交換あるいはバッテリィ交換に伴う記録不能な空白期間の完全除去を行うとともに、防塵対策容易で記録密度向上技術の進歩に応じて大容量化を容易に実現する。

【構成】 本体部1によって撮像対象となる被写体の映像と音声とを収集するとともに、この本体部1に取り付けられた各記録ユニット2、3の一方を選択し、これがメモリフルになるまで、この記録ユニットに前記映像と音声とを記録し、この記録ユニットを選択し、この記録ユニットに前記映像と音声とを記録する。
